

Node-H

Node-H Askey 5G Outdoor Small Cell

Node-H Askey 5G SA Outdoor Small Cell – SCU 2050

Deployment specialist brings 5G to market

Carrier-grade RAN solutions for rapid deployment

Node-H has a proven track record of wide-scale deployments at senior operators, and works closely with end-to-end eco-system vendors so operators can source complete or disaggregated solutions for their RAN.

Node-H carrier-grade software powers this standalone, fully-integrated, low-cost Askey 5G Outdoor Small Cell, which operates in the widely-used n77, n78 and n48 frequency bands.

Node-H brings deep technical know-how to solving real-world issues which has allowed carriers worldwide to deploy millions of cells based on Node-H software.

By working closely with technology partners, Node-H supports end-to-end and disaggregated solutions with different 5G cores and management systems.

The Node-H Askey 5G Outdoor Small cell brings turnkey disaggregated cells to public mobile operator uses cases. It also provides the foundation to rapidly address Private 5G networks

in vertical markets such as nomadic networks, real-estate, Industry 4.0 or Campus networks.

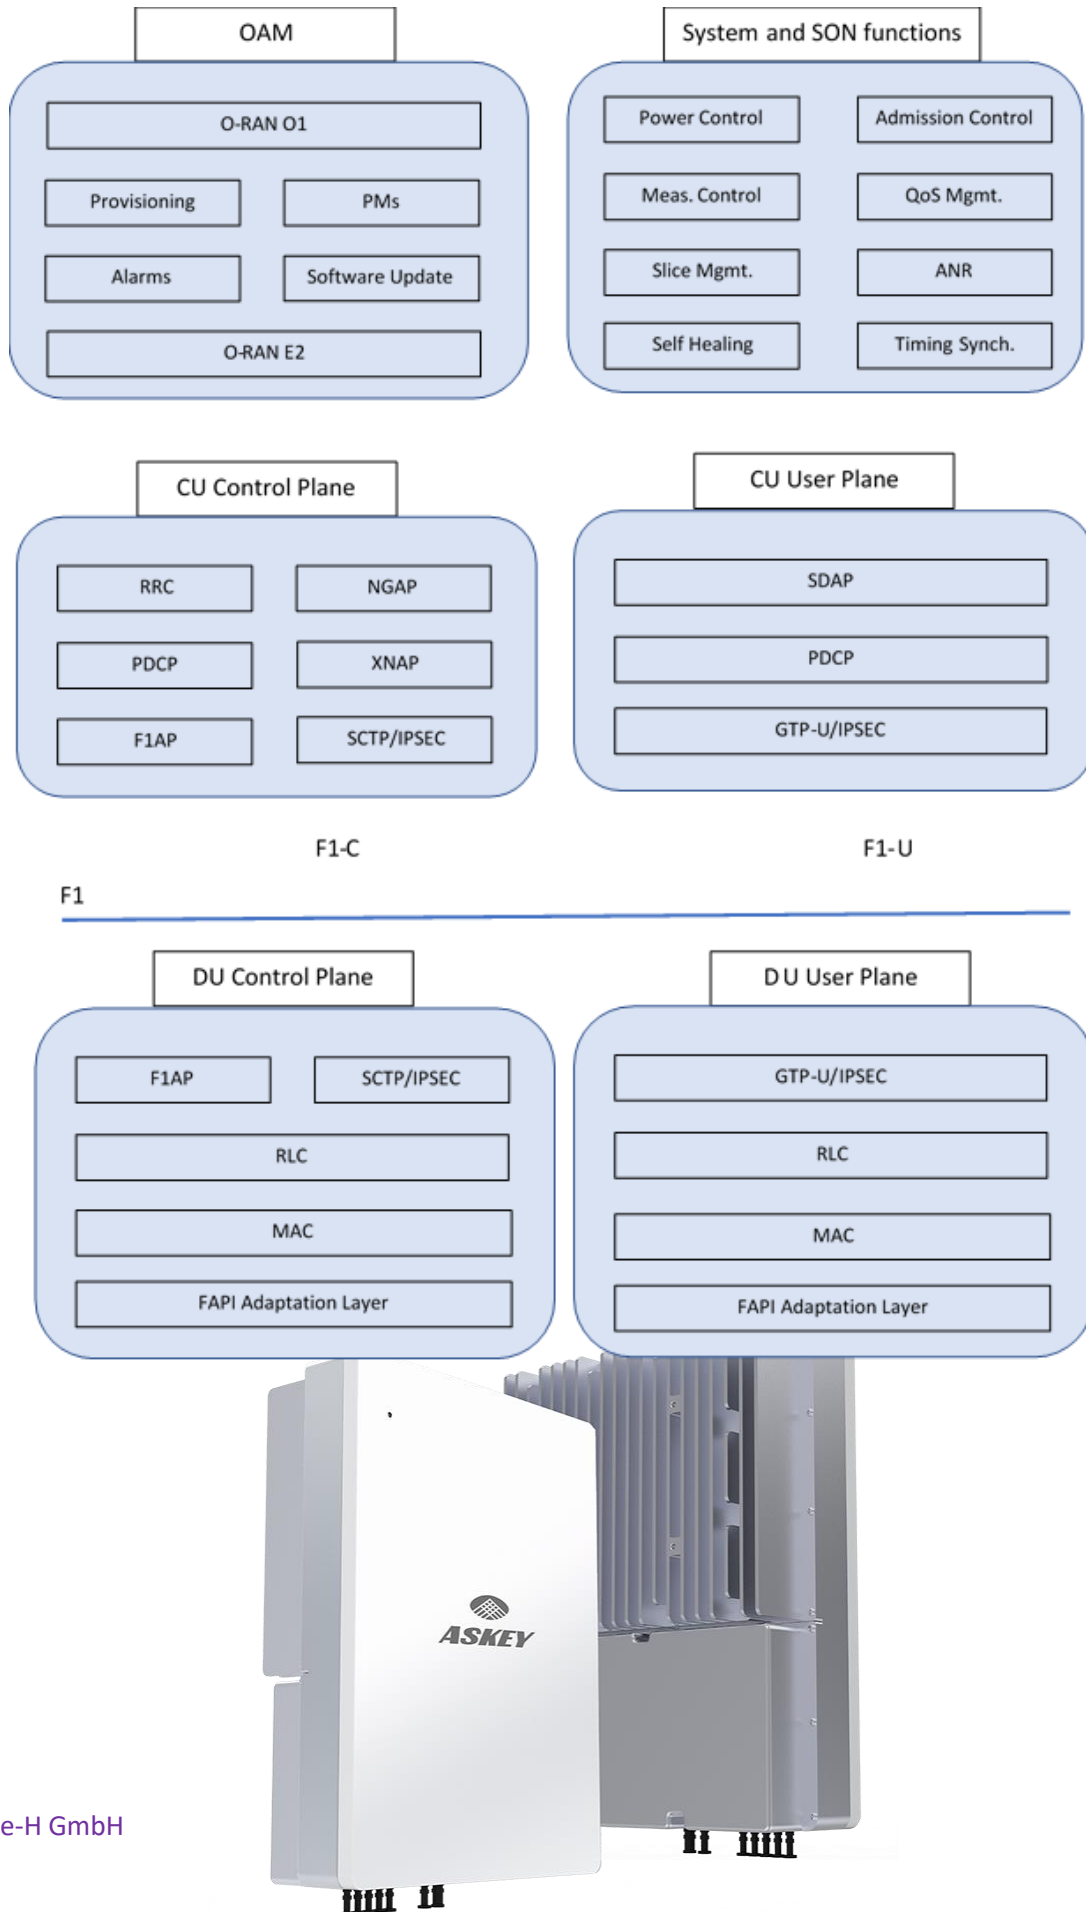

The Node-H 5G SA software follows the standards-based 3GPP architecture, as well as O-RAN and Small Cells Forum defined interfaces. Node-H has focused much effort on interoperability, having integrated Node-H based cells with infrastructure from all of the major network equipment vendors, and received the Chairman's Award from the Small Cell Forum for work on Interoperability.

Choose Node-H because...

Node-H has a uniquely experienced team of specialists who cover all of the major technologies required to implement complete RAN solutions.

Node-H integrates its system software, including a comprehensive security solution, management software, scheduler and L2/L3 protocols, with Askey's hardware design to deliver a ready-to-deploy solution with the lowest TCO.

gNode-B 5G Application

Features

SA Architecture	The Node-H Askey 5G Standalone Small Cell supports the Option 2 – NR Standalone architecture
Carrier Bandwidth	Up to 100MHz.
Power Management	Configurable up to 27dBm in steps of 0.1dBm.
Voice Calls and Quality of Service	5G VoNR in accordance with 5QI. Comprehensive 5QI support in UL and DL and association with vLAN configuration for end-to-end QoS.
Interference Management	Automatic interference management, ANR for establishing neighbor lists, Admission control.
Mobility	Measurements allow the cell to support 5G inter and intra Cell handovers, core based NG and cell-based Xn handovers are supported.
Network slicing	Multiple slices with network resource isolation.
Operations and Maintenance	Management of the cell is via the O-RAN O1 service models using Netconf/YANG in accordance with the relevant O-RAN specifications. E2 is also supported for research projects.
Security	The security of the platform is assured using the relevant O-RAN specification through the O1 interface. Ciphering with hardware acceleration, Signaling integrity checking. IPSEC, IKE v2 key management, AES, certificate-based security.
Timing Solution	The timing solution supports GNSS and PTP.
3GPP Release	The 3GPP message support corresponds to the 3GPP Release 17 specifications.
Ethernet PDU	Industry 4.0 features are available in special versions of the software.

2 x 250mW Outdoor Small Cell	
Standard	3GPP 5G Rel 15 Standalone mode, with Rel 17 messaging
Frequency Bands	n78 (3300 – 3800MHz), or n77, n78 and n48 (3550 – 4200MHz)
Bandwidth	100MHz
Antenna	Internal/External 2x2 MIMO
LED	1 LED
TX Power	250mW (24dBm) per port
Supported Users	Up to 64 UEs
Timing Synchronization	GPS / PTP
Backhaul	2.5G WAN/10G SFP+
Power Consumption	< 70W
Power Supply	AC90 – 264V
Dimension	W270 x H355 x D100mm
Weight	< 7KGS
Operating Temperature	-20°C to 55°C
IP Rating	IP65
Installation	Wall/Pole Mount
